PROFESSIONAL SUMMARY

Results-oriented IT Service Management professional with 12+ years of experience leading infrastructure and engineering teams in on-premise and hybrid environments. Proven ability to bridge technical execution with strategic planning, operating as both a hands-on technical contributor and collaborative leader. Skilled at implementing ITIL and ITSM frameworks while fostering collaborative environments where teams can grow and deliver exceptional results. Known for managing multiple cross-functional projects simultaneously, building positive stakeholder relationships, and driving organizational success through both technical innovation and people development.

CORE COMPETENCIES

IT Service Management: ITIL, Agile/Scrum, Change Management

Cloud & Infrastructure: AWS (EC2, VPC, S3), Azure, VMware ESXi/vCenter, Hybrid Architecture

Security & Compliance: Cloudflare Zero Trust, CrowdStrike EDR, Mimecast, Rapid7 IDR, Cisco Meraki, Intune

Collaboration: Microsoft 365, Exchange Online, SharePoint, Zoom (Phone, Chat, Meetings), Power Platform, iManage DMS

Service Management: Jira Service Management, Confluence, Zendesk

Networking: Cisco Meraki, Cloudflare, VPN, SD-WAN

Leadership: Team Development, Strategic Planning, Budget Management (\$2.5M+), Vendor Relations

EDUCATION

Western Governors University
Salt Lake City, UT

Information Technology Management
& Administration
2014-2018

CERTIFICATIONS

Professional Scrum Master I |

WORK HISTORY

Seed IP Law Group - Information Technology Manager

Seattle, WA • 07/2021 - 11/2025

Leadership & Team Development

- Provided leadership and mentorship to team of six IT members, managing workloads and fostering a culture of continuous improvement that ensured deliverables aligned with and contributed to firm-wide goals
- Established service catalog, SLA framework, and change management processes aligned with ITIL best practices, improving deployment success rates and driving continual process improvement
- Developed training programs and implemented knowledge repository for IT team, supporting succession planning and professional development
- Collaborated with IT Director on annual performance reviews and team development initiatives

IT Operations & Service Delivery

- Matured Firm's IT capabilities by partnering with business unit leaders to align IT roadmap with organizational objectives, supporting onboarding of new clients requiring IT Security standards and practices to be met through audits, enabling new revenue streams
- Implemented comprehensive security infrastructure, including CrowdStrike EDR, Mimecast email security gateway, Rapid7 IDR SIEM, and Cisco Meraki network security, strengthening the firm's security posture and ensuring compliance with client audit requirements
- Introduced end-user satisfaction surveys in Jira Service Management, achieving a 4.8/5 star satisfaction rating and implementing action plans that improved response times by 25%
- Collaborated in the development of technology-related policies and procedures across departments

Strategic Planning & Vendor Management

- Oversaw \$2.5 million annual IT budget, managing asset lifecycle, fiscal review, and procurement for technology purchases
- Partnered with IT Director on IT strategic planning, technology roadmap development, and annual budget preparation, including evaluation and standardization of hardware/software across the firm

VOLUNTEER WORK

- Snohomish County Auxiliary Communications Service (ACS)
- Snohomish County Volunteer Search and Rescue

- Negotiated with vendors to maximize operational efficiencies and achieve cost savings during renewals

Notable Accomplishments

- **Digital Workplace Transformation:** Led unified communications migration from on-premise Cisco phone system and low-adoption Jabber deployment to Zoom Phone, Meetings, and Chat, achieving 100% user adoption through comprehensive training and change management, while implementing Cloudflare Zero Trust to replace Pulse Secure VPN and Cisco Umbrella, modernizing remote access and security infrastructure
- **Service Management & Knowledge Transformation:** Spearheaded migration from Zendesk to Jira Service Management and Confluence, establishing ITIL-aligned knowledge bases with technical writer partnership, reducing average service resolution time by 10-15 minutes and driving firm-wide adoption that improved training and onboarding across all departments
- **Infrastructure & Cloud Modernization:** Drove iManage DMS upgrade from on-premises to SaaS with Power Platform API integrations, transitioned infrastructure to co-location facilities reducing hardware footprint from 110 to 80 servers, and architected hybrid cloud environment using AWS and Azure, increasing resiliency aligned with BCP and ITIL objectives
- **Organizational Development & Agile Adoption:** Implemented Scrum framework and introduced quarterly professional development program, both subsequently adopted firm-wide, driving continual improvement, enhanced stakeholder collaboration, and improved project delivery timelines aligned with ITIL's four dimensions of service management

Seed IP Law Group - System Administrator

Seattle, WA • 08/2018 - 07/2021

Led enterprise IT infrastructure and operations, managing mission-critical systems through rapid organizational growth and the firm's emergency transition to remote work during COVID-19. Demonstrated leadership capabilities that led to the creation of the IT Manager role.

- Administered hybrid IT environment supporting growth from 140 to 186 users, maintaining 99.9% uptime across physical/virtual servers, storage, networking, and cloud services
- Architected hybrid cloud infrastructure leveraging AWS (EC2, VPC) and Microsoft Azure, establishing site-to-site VPN connections and redundant Domain Controllers across cloud environments, enhancing business continuity and disaster recovery capabilities
- Consolidated server infrastructure from 110 to 80 servers through strategic optimization, reducing operational costs and complexity
- Led VMware ESXi upgrades, hardware migrations, and Exchange 2016 to Exchange Online migration in hybrid configuration
- Spearheaded firm's emergency transition to 100% remote work during COVID-19, rapidly deploying laptop infrastructure to 186 employees through pre-pandemic hardware standardization initiative
- Recruited, hired, and onboarded two Help Desk team members remotely, while providing technical leadership and mentorship to IT team of six
- Developed custom automation scripts and monitoring solutions, improving operational efficiency and reducing incident response times

- Created comprehensive documentation and knowledge management systems, establishing best practices and enabling team scalability

Nuvodia - IT Support Engineer

Spokane, WA • 12/2015 - 08/2018

Provided managed IT services and technical consulting to multiple client organizations, administering Windows Server, SharePoint, Office 365, and VM environments while serving as primary technical liaison and trusted IT advisor.

- Administered Windows Server, SharePoint, VM environments, and Office 365 infrastructure for diverse client base, ensuring system reliability and optimal performance
- Deployed and managed MDM solutions and BYOD policies, enhancing security posture and compliance across client environments
- Traveled to client sites as primary engineer for on-site support and project delivery, strengthening relationships through effective problem-solving
- Created automation scripts for software deployments, reducing deployment time and manual errors
- Coordinated project resources and timelines, delivering solutions on schedule while managing client expectations and communications

Geek Squad - Best Buy - IT Field Engineer (Double Agent) / Event Manager

Greater Seattle Area • 08/2010 - 01/2016

Provided IT support for residential and small business clients while advancing to event management role leading regional technology education programs.

- Diagnosed and repaired hardware/software issues for residential and small business clients while planning and deploying network solutions
- Advanced to Event Manager role, recruiting and managing 20-35 temporary employees for regional technology education events serving up to 200 youth participants
- Established partnerships with non-profit organizations, coordinated multi-regional events, and mentored junior technicians
